Any impaired loss of a revalued asset shall be treated as a revaluation decrease. No such impairment has been raised till the reporting date.

4.03 Provision , Contingent Liabilities and Contingent Assets :

Contingent Liabilities and Contingents Assets are present or possible obligations or on liabilities or assets , arising from past events and existence of which depends upon the occurrence or non-occurrence of one or more uncertain future events which are not within the control of the company or which amount of the obligations cannot be measured with sufficient reliability. In accordance with IAS-37 .

4.04 Intangible Assets

In Compliance with the requirements of IAS, 38 Intengible Assets '
The following terms are used in this Standard with the meanings pecified:
Amortisation is the systematic allocation of the depreciable amount of an intangible asset over its useful life.
An asset is a resource:
(a) controlled by an entity as a result as past events; and
(b) From which future economic benefits are expected to flow to the entity.

(d) Statement of Cash Flows (Un Audited)for the year ended 30 September 2026

(e) Notes, comprising a summary of significant accounting policies and other explanatory information.

4.06 Risk exposure

Interest rate risk

Interest rate risk is the risk that Company faces due to unfavorable movements in the interest rates. Changes in the government's monetary policy, along with increased demand for loans/ investments tend to increase the interest rates. Such rises in interest rates mostly affect companies having floating rate loans or companies investing in debt securities.

Management perception

The Company maintains low debt/ equity ratio; and accordingly, adverse impact of interest rate fluctuation is insignificant. Moreover maximum debts are interest free.

Exchange rate risk

Exchange rate risk occurs due to changes in exchange rates. As the Company imports materials and equipment from abroad and also earns revenue in foreign currency, unfavorable volatility or currency fluctuation may affect the profitability of the Company. If exchange rate increases against local currency, opportunity arises for generating more profit.

Management perception

The products of the company are sold mostly in US$ currency and the transaction would settle within very short period. Therefore, volatility of exchange rate will have no impact on profitability of the Company.

Industry risks

Industry risk refers to the risk of increased competition from foreign and domestic sources leading to lower prices, revenues, profit margin, and market share which could have an adverse impact on the business, financial condition and results of operation.

Management perception

Management is optimistic about growth opportunity in textile sector in Bangladesh. Furthermore there is untapped international market.

Goutam Chandra Roy
Chief Financial Officer
Queen South Textile Mills Ltd

Brig Gen Asif Ahmed Ansari (Retd)
Chief Executive Officer (CEO)
Queen South Textile Mills Ltd.

Market risks

Market risk refers to the risk of adverse market conditions affecting the sales and profitability of the company. Mostly, the risk arises from falling demand for the product or service which would harm the performance of the company. On the other hand, strong marketing and brand management would help the company increase their customer base.

Management perception

Management is fully aware of the market risk, and act accordingly. Market for textile products in Bangladesh is growing at an exponential rate. Moreover the company has a strong marketing and brand management to increase the customer base and customer loyalty.

Operational risks

Non-availabilities of materials/equipment/services may affect the smooth operational activities of The Company. On the other hand, the equipment may face operational and mechanical failures due to natural disasters, terrorist attacks, unforeseen events, lack of supervision and negligence, leading to severe accidents and losses.

Management perception

The company perceives that allocation of its resources properly can reduce this risk factor to great extent. The Company hedges such risks and also takes preventive measures therefore.

Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price.

Management perception

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Typically, management ensures that it has sufficient cash and cash equivalent to meet expected operational expenses, including the servicing of financial obligation through preparation of the cash forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.
